PROFESSIONAL PROFILE

Software Engineering graduate and final-year Master's student in Data Science with experience in software testing, technical documentation, programming, and technology-based problem solving. Skilled in software quality assurance, web development fundamentals, and AI/data science concepts. Passionate about artificial intelligence, AI model evaluation, and developing data-driven solutions that solve practical problems.

PROFESSIONAL EXPERIENCE

Software Tester Intern

06/2021 – 09/2021

Spur Hero • Buea, Cameroon

- Conducted comprehensive manual and automated testing architectures on web and mobile deployments.
- Identified, systematically documented, and tracked software code bugs using structural validation pipelines.
- Collaborated interactively with developers to verify system fixes and optimize cross-platform software quality.
- Authored technical project test documentation, integration guidelines, and functional end-user guides.
- Participated actively in Agile/Scrum cross-functional development sprints and team stand-ups

Freelance Graphic Designer

2021 – Present

Independent Practice • Buea, Cameroon

- Designed standard digital marketing materials, promotional layouts, flyers, banners, and tailored social assets.
- Formulated scalable corporate visual identities and professional branding kits for businesses and organizations.
- Leveraged advanced design methodologies and visual principles to cleanly express messaging ideas.

Founder

2022 – Present

Small-Scale Liquid Detergent Enterprise • Cameroon

- Directed micro-enterprise product development pipelines, chemical metrics, packaging design, and customer retention.
- Created cross-channel marketing materials, print ads, and operational promotional materials to back business scaling.
- Maintained core financial records, daily bookkeeping metrics, supply logistics, and high-level operational management.

TECHNICAL PROJECTS

Inventory Management System

Django & Python

Full-Stack Engineering Framework

- Developed a secure, database-driven environment to organize complex product logging models and live sales metrics.
- Applied classic software engineering architectural principles to structuralize scalable backend functionality.
- Optimized practical expertise across structured query management, route handling, and server data storage mechanisms.

EDUCATION

Master's Degree in Data Science

2025 – Present

Landmark Metropolitan University of Buea • Cameroon

Bachelor's Degree in Software Engineering

2023 – 2025

Landmark Metropolitan University of Buea • Cameroon

B.Sc. Physics (incomplete)

2021 – 2022

University of Buea • Cameroon

Advanced and Ordinal Level Education

2018 – 2021

RBC Bafoussam • Cameroon

LEADERSHIP & INVOLVEMENT

Youth Leader

2023 – Present

Full Gospel Mile 18 Assembly • Buea, Cameroon

- Coordinated strategic youth programs, community activities, and specialized event agendas.
- Managed mentorship clinics and technical skills development programs to empower youth group communities.
- Cultivated high-level cross-functional communication dynamics, strategic leadership, and teamwork milestones.
